Teacher let your hair hang down...”**

A Center for Instructional Excellence Faculty Workshop on

Developing and Redesigning Courses in
Experiential Education

with

**Sheri Dressler, Director
Experiential Education
University of Central Florida**

This workshop is designed for faculty interested in learning to **do** Experiential Education—with hands-on demonstrations of how to redesign existing courses and develop Experiential Education components within courses.

This workshop will be facilitated by Dr. Sheri Dressler, Director of Experiential Education at University of Central Florida—one of the largest experiential ed programs in the nation—and recipient of the 2006 Award of Excellence by the National Society for Experiential Education.

Dr. Dressler will provide examples of experiential education activities for learning objectives for a variety of courses across disciplines—from humanities and social science to engineering, technology, and natural science. Faculty will work on developing their own content-specific course designs, including: identifying possible site needs, sample assignments and activities, possible course materials, and how to integrate reflection into the experiential ed design.

**9am-1pm, Friday, December 8, 2006
The Center
Purdue University Calumet**

No registration fee. Healthy brunch provided. Space limited!
Advance registration required by December 5 at www.calumet.purdue.edu/cie
